WORK EXPERIENCE

Frontend Engineer

Eazybillz

10/2023 - 05/2024

Lekki, Lagos

Worked on Cribbase which is an estate management system for estates that needs easy payment, announcement, and various other systems.

Achievements/Tasks

- Reduced website downtime by proactively identifying and fixing broken links and other issues, ensuring seamless user experience.
- Performed unit testing of web applications and troubleshoot issues
- Worked with Back-End Developer to Integrate APIs to web pages
- Optimized site content for mobile devices using responsive design techniques

Fullstack Engineer

FaanTaxi

06/2024 - 10/2024

FaanTaxi is a taxi park management application that interacts with an IOT physical device that gives drivers access into and outside the park.

Achievements/Tasks

- Utilized cutting edge technologies including Next.js, TypeScript, Zustand, Prisma, PostgreSQL and more.
- Collaborating closely with other team members to work on the project during all phases.
- Enhanced the usability of existing applications by applying the latest accessibility standards and best practices.
- Proved successful working within tight deadlines and a fast-paced environment.
- Troubleshoot technical issues related to front end development, ensuring prompt resolution to maintain project timelines.

Fullstack Engineer

Allaccessfans

10/2024 - Present

Allaccessfans is a content based web application for users that wants to support creators by subscribing, and getting access to exclusive contents.

Achievements/Tasks

- Working closely with UX/UI designers to translate their designs into functional web applications.
- Utilized version control systems such as Git to track changes throughout the development process
- Troubleshoot technical issues ensuring prompt resolution to maintain project timelines.
- Maintaining website performance by conducting regular updates and addressing compatibility issues across various platforms

PERSONAL PROJECTS

BDMeds (05/2024 - 07/2024)

- Presented the project to PipeOps panel of Judges and was awarded 1st place during HackOps 1.0 hackathon.
- I worked on the UI while my partner worked on the backend.

DisuXChange (04/2024 - 10/2024)

- Build the DisuXchange application from scratch.
- Built the Frontend using Next.js, NextAuth, Zustand, React Query and more.
- Built the Backend using Nest.js, Typeorm (ORM), and Mysql for database.
- Dockerized the application using docker
- Manually deployed it to a Virtual Private Server.

ACHIEVEMENTS

1st Place in the 2024 PipeOps Hackathon 1.0 (05/2024 - 07/2024)
